Analysis & Visualization Dashboard building, KPI tracking, Trend Analysis, Performance Reporting, Data Storytelling
Systems User & asset management, Handling large datasets (Synergy-style system experience), System monitoring
Technical Python, JavaScript, React, REST APIs, Node.js, Git
Professional Clear communication, Problem Solving, Analytical Thinking, Team Player

EXPERIENCE

IT Assistant

Nov '22 — Jan '24

Aviyan Laghubitta Bittiya Sanstha Limited (Microfinance)

Kavrepalanchowk, Nepal

- Analyzed operational and financial data using SQL Server and prepared regular reports to support operations across more than 60 branches.
- Monitored network and database performance to ensure smooth data flow, improving the accuracy and reliability of reports.
- Managed data for over 200 user accounts and IT assets, maintaining data accuracy, consistency, and compliance with internal policies.
- Identified recurring system issues, investigated root causes, and implemented effective solutions that reduced overall downtime by 95%.
- Worked closely with different departments to understand their reporting needs and delivered clear, data-driven insights to support daily operations and planning.
- Provided training to more than 40 employees on proper data handling and cybersecurity practices, helping improve data accuracy and awareness across the organization.

Junior IT Assistant

Sep '21 — Oct '22

Job Seeker Manpower Pvt. Ltd.

Kathmandu, Nepal

- Supported daily IT operations by troubleshooting network and user account issues, helping maintain smooth system performance, and reducing downtime.
- Maintained and regularly updated asset management databases to accurately track IT equipment, software licenses, and user access.
- Managed and processed applicant data for 200–300 overseas job seekers per recruitment cycle, ensuring data accuracy, proper documentation, and secure handling of sensitive information.

PROJECTS

Comparative Analysis of Academic Performance and Career Outcomes [Link](#)

- Analyzed multi-sheet educational datasets using Python, Pandas, and Seaborn. Built data visualizations and delivered actionable insights to identify factors impacting academic outcomes.

IMS-CONNECT (Innovation Management System) [Link](#)

- Developed a full-stack web platform enabling secure authentication and role-based collaboration.
- Implemented RESTful APIs and integrated user management for seamless innovation tracking and idea sharing.
- Technologies: React, Node.js, Express, SQL Server, REST APIs
